

SPECIAL CHAPTERS IN RNA RESEARCH

VIENNA BIOCENTER CAMPUS

Monday, 25th November 2013

- **Julius Brennecke** (IMBA, Vienna)
Pi RNA biogenesis and transposon control
- **Isabella Moll** (Univ. Vienna)
General and specific aspects of translational control in prokaryotes
- **Kazufumi Mochizuki** (IMBA, Vienna)
Small RNA-directed DNA elimination
- **Alex Stark** (IMP, Vienna)
Transcriptional control by genomic enhancers

Monday, 13th January 2014

- **Boris Görke** (Univ. Vienna)
Riboregulation of prokaryotic gene expression
- **Michael Nodine** (GMI, Vienna)
Small RNA functions during plant reproductive development
- **Florian Pauler** (CeMM, Vienna)
Mapping and functional characterization of long non coding RNAs
- **Juan Valcárcel Juárez** (iCrea, Barcelona)
Alternative splicing of RNA precursors and cancer

Monday, 20th January 2014

- **Alwin Köhler** (Medial Univ. Vienna)
Transcription coupled RNA export
- **Antoine Cléry** (ETH Zürich)
From structures to functions of splicing regulators
- **Luisa Cochella** (IMP, Vienna)
Spatio-temporal specificity of miRNA biogenesis during development
- **Stefan Ameres** (IMBA, Vienna)
Mechanisms in RNA Silencing ODER Mechanism and Biology of RNA Silencing

University of Vienna & Medical University of Vienna
| 2 ECTS credits |
