

PostDoc Day

17 January 2013

IMP Lecture Hall

10:00 Renée Schroeder, Gabi Permoser
Introduction

10:15 Nicolas Coudevylle, University of Vienna
Looking at disordered protein complexes by NMR

10:45 Maxim Molodtsov, MFPL and IMP, VIPS Fellow
A Versatile Optical Force Spectroscopy Tool for Probing Mechanical sub-steps in Molecular Motors

11:15 Oliver Vesper, University of Vienna
Modulation of protein synthesis by Toxin-Antitoxin systems in E. Coli

11:45 Botond Cseh, University of Vienna
Role of Raf in Angiogenesis

BREAK

13:30 Maiwen Caudron-Herger, DKFZ and BioQuant Center Heidelberg, Germany
Maintenance of active transcription sites by RNA

14:00 Angela Hancock, MFPL, VIPS and NFS Fellow
In search of the elusive Cape Verde Islands Arabidopsis

14:30 Brooke Morriswood, University of Vienna
Proximity-dependent biotinylation as a novel technique for identifying binding partners and near neighbours in vivo

15:00 Ruth Müller, Research Fellow, Austrian Institute of International Affairs, Science, Technology Policy Group
Living and working as life science postdocs. Problems, challenges and perspectives.

15:30 Final Discussion

Snacks and Refreshments, Networking
